OVERVIEW

"Great web design without functionality is like a sports car with no engine." - Paul Cookson

Beautiful websites aren't going to get you conversions - functional websites will. Now, I'm not saying to throw out graphic design, but instead this week we will learn how to create beautiful AND functional websites. You need both for an awesome website. If you're nervous about the graphic design aspect of this lesson, do not fear! We will teach you the principles of graphic design that are much more clear than people saying "only some people have the right eye for it". As always I hope you learn a lot and are able to apply the principles you learn to real life :)
