OVERVIEW

"Landing pages need to look appealing, but most of all they need to convert." - Russell Brunson

Following our lesson of websites, we will now dive into the field of landing pages. Landing pages cannot be found on your actual website, but instead are like bait that causes users to head straight for the conversion part of the funnel. You will not only learn how to create a landing page yourself, but also get to provide feedback to our current clients' landing pages. Don't be intimidated! Our goal is to help you to learn and grow and we will be here to help.
